OUR MISSION//:
IS TO PRODUCE **PRODUCTS OF SUPERIORITY,**
THAT SERVE A FUNCTION & ULTIMATELY GIVE YOU
PIECE OF MIND. CLUBS & BARS THE WORLD OVER
RELY ON OUR **PRODUCTS TO PROTECT THEIR**
EQUIPMENT INVESTMENTS.

In the beginning //: We started in 2008 knowing that there was a void in protection for DJ equipment. The club environment can be harsh, with smoke, dust and sticky liquids being daily hazards for club owners and DJs to keep in check. Decksaver® covers are specifically designed to keep your equipment investments safe and sound.

Our covers are tailor-made to exacting standards to fit specific DJ equipment like a glove. Rather than using cheaper inferior plastics, each cover is manufactured from Polycarbonate - a very hardwearing plastic used in bullet proof glass. The use of Polycarbonate means that thinner material can be used, making for discrete, strong yet attractive protection for your equipment.

DECKSAVER®

PROTECTING DJ GEAR

DECKSAVER® - 40 YEARS IN THE MAKING//: There are inevitably imitations of our products produced under different brands which we are very humbled by.

However there is the unquestionable fact that there is no alternative for quality.

Decksaver® is designed, engineered and manufactured in the United Kingdom using our knowledge of over 40 years in plastics design and the latest innovations in engineering technology.

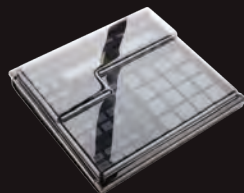

HOWEVER THERE IS THE UNQUESTIONABLE FACT THAT THERE IS NO ALTERNATIVE FOR QUALITY AND FINISH THAN DECKSAVER® //
