MA LIGHTING®

grandMA2 onPC

- Comprehensive and powerful software-tool for all standard computers
- Supports all functions of the grandMA2 consoles with authentic look and feel
- Ideally suitable as live show controller or backup system in connection with the MA NPU (Network Processing Unit), MA 2Port Node onPC/onPC PRO or the MA NSP (Network Signal Processor)
- Communicates with grandMA2 consoles via MA-Net2 over Ethernet
- grandMA2 onPC also serves as a user-friendly designer remote control for all grandMA2 consoles
- Expandable to a complete design studio by connecting to grandMA 3D
- grandMA2 onPC is available free of charge: www.malighting.com

The grandMA2 onPC software is the perfect solution for offline editing.

With its comprehensive possibilities, grandMA2 onPC is an ideally suited backup solution in MA networks, that can be used as an offline pre-programming tool and is extendable to a complete design studio by connecting it to grandMA 3D.
Additionally grandMA2 onPC can be linked via Ethernet to any grandMA2 console or the grandMA2 replay unit in a multi-user network system. By this grandMA2 onPC can read the shows of the consoles and enables the user to easily archive the files.
Finally, grandMA2 onPC offers a very convenient way to update MA equipment in the network from just one location.
The grandMA2 onPC software can be downloaded free of charge at www.malighting.com, where you will also find the relevant system requirements.
