

NUVJ

VJ SOFTWARE & CONTROLLER INTERFACE

INTUITIVE VIDEO MIXING CONSOLE AND PERFORMANCE TOOL. The NuVJ lets DJs easily incorporate professional quality video mixes into their performance. With the NuVJ, the VJ can trigger images and video clips, add effects to them, mix them through an onboard DJ style crossfader and tweak them in order to create unique and spectacular shows. The hardware controller works seamlessly with existing DJ gear and the software is compatible with Mac and Windows computers.

NuVJ integrates tightly with the included Arkaos™ custom software and is designed to work intuitively in the same way that DJs mix music. The software package includes a library of video clips and over 30 real-time video effects. The NuVJ is simply easier, more versatile and more affordable than any other VJ product on the market.
