

M1Active 520 & 620

2-WAY 75-WATT AND 95-WATT ACTIVE REFERENCE MONITORS

The M1Active 520 and 620 are the third generation of the acclaimed Alesis M1 Active Series. Both 520 and 620 models offer incredible bass and midrange definition and flat frequency response from their high-precision drivers and professionally-crafted crossovers.

With a bold new look, redesigned drivers, bass density control and EQ, these affordable, high-precision active reference monitors deliver superb sonic clarity.

FEATURES

- 6.5" and 5" low frequency woofer for clear bass and midrange
- Bi-amplified design / tweeter – 25W and 30W, woofer – 50W and 65 W
- 1" silk dome tweeter for smooth, detailed highs without harshness
- High-precision drivers offer lower distortion and smoother frequency response
- Acoustical waveguide for superior imaging with minimal diffraction
- 1" thick front baffle virtually eliminates speaker resonance
- Magnetically shielded for close placement to video monitors in computer-based music production studios
- XLR and 1/4" TRS input connectors with volume control
- Low frequency density switch for acoustic space adjustment of the monitors
- Rear port design provides deep bass extension and increased SPL
- Hi, mid and low frequency EQ switches to accommodate user preference and sub-woofers
- Top mounted, integrated power switch/clip light bar
