

The SB160 is a compact stereo power amplifier that can be used as a stand-alone or modular amplifier. The amplifier can be used as an extra amplifier for separate rooms (e.g. kitchen, bathroom, office, ...) or as an amplifier for a multi-room audio or matrix system.

The front panel of the amplifier has two volume controls (left & right channel), headphone jack input for monitoring, a signal & protection led indicator per channel and limit led indication.

The mono-stereo switch and 100 Hz low cut switch are some of the useful installer features on the rear panel that allow you to achieve a perfect sound quality.

As no compromises were accepted on the component quality, the SB160 will guarantee you a HiFi sound.

TECHNICAL SPECIFICATIONS

Input	RCA Cinch, 775 mV, 20 kOhm
Output (RMS Program)	8 Ohm: 2 x 60 watt / 2 x 80 watt Max 4 Ohm: 2 x 80 watt / 2 x 100 watt Max
Frequency Response	20 Hz - 30 kHz
Limiter	Dynamic-slow @ -3 dB, defeatable
Distortion	<0.03%
Low-cut	100 Hz, 12 dB/oct
Mono - Stereo	Via push button
Power Supply	230V
Dimensions (H x W x D)	140 x 70 x 335 mm
Weight	3.6 Kg
