

# BT-700S

## :: Product Description

- \* Powerful moving head, based on HTI-700 discharge lamp!
- \* Extremely high optical output and precision for razor sharp gobos
- \* Extremely silent ventilation system, perfect for TV-studio and stages
- \* Modular design for easy servicing
- \* 2x 16 character LCD display for menu driven setup.
- \* 16 or 22 DMX control channels:
  - \* 16 DMX channels (pan, tilt, pan/tilt speed, dimmer, shutter/shaking, color1, color2, gobo1, gobo1 rotation, gobo2, prism/prism macros, prism rotation, focus, iris, special functions)
  - \* 22 DMX channels (pan, tilt, pan/tilt speed, dimmer, shutter/shaking, color1, color2, gobo1, gobo1 rotation, gobo2, prism/prism macros, prism rotation, focus, iris, special functions, pan 16bit, tilt 16bit, movement macros, movement size, iris macros, dimmer macros)
- \* Pan 540° in 2,8sec and tilt 270° in 1,6sec (both in 8 or 16 bit)
- \* Automatic pan/tilt sensor correction with home position adjustment
- \* Pan/tilt lock function during transport
- \* 2 gobo wheels with sensor index system and gobo mixing:
  - \* Gobo wheel1: 5 exchangeable, rotating, indexed gobos plus white
  - \* Gobo wheel2: 5 exchangeable fixed gobos
- \* 2 color wheels with sensor index system and color mixing:
  - \* Color wheel1: 6 colors + white, with bi-directional rainbow effect
  - \* Color wheel2: 6 colors + white, with bi-directional rainbow effect

- \* Prism with bi-directional rotation
- \* 0-100% mechanical linear dimmer with macro functions
- \* 0-100% motorized linear iris with macro functions
- \* High speed strobe: 1 ~ 12 flash/second

### **:: Technical Information**

Lamp: HTI 700W / D4-75

Beam angle: 15°

### **:: Extra information and order codes**

Available: around November 2007
