

# PB-01 LED POWER control

## :: Product Description

- \* This special PIX controller makes it easy to control both LED POWER BANK and LED POWER BEAM without the need for a complicated DMX-controller.
- \* Thanks to the internal clock this controller can create full automatic schedules for the illumination of buildings (hotels, shops, discotheques, public & amusement parks, fairgrounds, &hellip; ) with several different programs at different times of the day!
- \* Several internal programs:
  - \* 8 different wash programs (smooth color fades with adjustable step/fade times)
  - \* 8 different effect programs (color chases with adjustable speed)
  - \* 8 editable programs (up to 100scenes can be adapted by the user)
- \* The PB-01 can also be connected to any DMX-controller so all effects can be activated by DMX.
- \* Menu driven LCD-display (2x 16 characters) with password protection to prevent unauthorized changes to the programs.
