AXIR

AUDAC introduces the brand-new column speaker "AXIR", an all-round 100 V column speaker with an extraordinary sound and a surprisingly high power.

The AXIR is designed to be used in all applications where audibility of music and speech is very important, like auditoria, churches, meeting and board rooms, etc. It features a double speaker section which can be set to different power taps individually, to create a specific polar pattern, best suited for the situation it is installed in.

The power taps that can be selected are: 20 W, 10 W, 5 W, 2,5 W per speaker section. This makes a maximum of 40 W and a minimum of 2,5 W in 100V applications.

The AXIR features an aluminum housing, making it a light weight column speaker of approximately 4 Kg.

For mounting the AUDAC AXIR, a specially designed wall bracket is included, which makes it possible to focus the speaker in any direction, to obtain the best possible audibility.
