CMX720

The CMX720 versatile headset microphone was designed for a wide series of vocal and speech applications, ranging from speeches to aerobic lessons. The high Sound Pressure level sees to it that even hard, vigorous sound won't distort the sound reproduction, while the omnidirectional polar pattern reduces feedback to a strict minimum. The flat frequency response ensures a high-fidelity sound reproduction, true to the user's voice and intonation. Provided with foam windscreen and cord clip, the CMX720 is ready to use in a variety of applications, whether the user needs to sit down or move around. The tiny design of the microphone doesn't decrease its performance, but enhances the user's comfort and makes wearing it almost unnoticeable, both to speaker and audience. Together with its skin color, these features make the CMX720 blend into the surroundings and, most importantly, allow it to be used in delicate situations.

The microphone is available as CMX720/BX (black color with 4 pole mini XLR), CMS720/SX (skin color with 4 pole mini XLR), CMX720/BJ (black color with mini jack) and CMX720/SJ (skin color with mini jack).

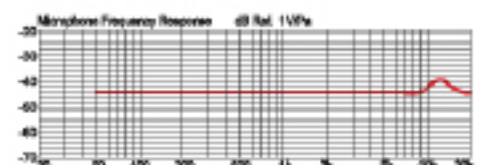

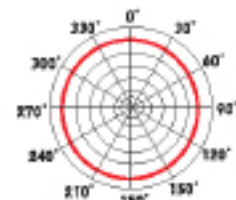

4 pole mini XLR

mini jack

PRODUCT FEATURES :

Type	Back electret condenser
Polar pattern	Omni-directional
Frequency response	20 Hz—20 kHz
Sensitivity	-44 dB \pm 3 dB (0 dB = 1V/Pa @ 1 kHz)
Impedance	1000 Ohm \pm 30% (@ 1 kHz)
Maximum SPL	130 dB (THD 0.5% 1000 Hz)
Power supply	1.5 V—10 V DC
Output connector	4 pin mini-XLR connector
Colors	CMX700/SX - skin color CMX700/SJ - skin color CMX700/SX - black color CMX700/SJ - black color
Dimensions microphone	\varnothing 5.0 mm
Dimension cable	\varnothing 1.5 mm x 1.2 m
Weight	Approx. 25 gr
Accessories included	Foam windscreen, cord clip

About Audac :

AUDAC provides a complete range of audio equipment such as amplifiers, loudspeakers, microphones, conference microphones and much more.
