FEATURES :

Design ceiling loudspeakers in modern metal housing, with an aluminium grid

Quick and easy installation

APPLICATIONS :

The uniquely designed CUBAN square loudspeakers are flush-mounted into ceilings and inside wall-mount installations. They provide high-quality, wide-dispersion sound while remaining as unobtrusive as possible.

Efficiency is very important for inside-wall applications. The highly efficient Cuban answers this need with its ability to generate sound with very little power. In fact, the Cuban can generate sound from solid surfaces by utilizing only 3 to 25 watts. These 2-inch high-performance speakers have a small-perforated designer grille and are ideal for offices, boutiques, shops and hotel rooms. Within this group are ceiling-mount solutions for background, multipurpose, high-definition and in combination with an AUDAC bass subwoofer loudspeaker, the sound will be great.
