## IS 4 HID

L'IS 4 HID est un goboflower DMX avec lampe à décharge HID 150 W. De plus en plus d'installations lumière manquent d'animation lumineuse. Certes les lyres et les scans font dorénavant partie de toutes les installations, mais il n'y avait pas sur le marché de goboflower suffisamment puissant pour répondre aux flux lumineux des robotisés. Voilà chose faite, I solution propose là un vrai compromis avec un rendu absolument exceptionnel à voir.

IS 4 HID is a DMX goboflower utilizing a powerful 150W HID discharged lamp. More and more lighting applications miss the eye catching entertainment animations. Scans and moving heads are now being parts of all lighting shows, however, powerful gobo flowers did not exist in providing sharp lighting beams until IS 4 HID comes around! I solution range offers from now on a really convenient compromise between scans and moving heads:  please welcome IS 4 HID featuring exceptional lighting effects !
