

CUE DJ SOFTWARE

IMAGINED BY DJS, PERFECTED BY NUMARK. Numark's club tested, professional-level DJ software and a personal computer are all you need to create the ultimate mix. Monitor your mix through headphones and visually on your computer screen. Output your masterpiece to a club's sound and video system. Use CUE 5's built-in broadcast functionality to podcast on the web.

Every DJ can also be a VJ, using CUE's built-in video transitions and effects. CUE supports CD+G formats for a quick and easy Karaoke setup. You can mix, scratch, juggle and sample audio and video files interchangeably, without expensive, bulky hardware.

Version 5 includes loads of new enhancements including FreeFrame plug-in compatibility, Smart Database management, and a powerful new Global Search function. Try CUE 5 today using the free, downloadable demo available online from www.numark.com.

NEW – VERSION 5 NOW AVAILABLE!

FEATURES

- Mix, scratch and interchange audio or video
- **NEW** Smart Database Management – Automatically checks database integrity at launch and fixes errors by cleaning out missing and removed files
- **NEW** Global Search – Files are automatically added to a global search database for quick retrieval from multiple folders and drives
- **NEW** Cover art browser automatically downloads and displays cover artwork
- **NEW** Video Plug-ins add more powerful effects and titles to your video presentation
- Industry-leading stability and reliability
- Waveform overlay combines both decks in a single easy to read display
- Built-in video and audio mixers with multiple video transitions and effects
- Choose from a variety of built-in effects, add VST plug-ins, and create beat-matched loops and samples on the fly
- Karaoke player with enhanced CD+G File Detection shows all karaoke files in a single click
- Output video to a projector, TV, or monitor
- **IMPROVED** Side List - Automatically lists tracks added to a deck but never played. Several new keyboard and controller shortcuts are now available for the sidelist
