

## iM9

4-CHANNEL DJ MIXER WITH EFFECTS, BPM DETECTION AND DOCK FOR iPod

### FOUR CHANNELS TO MIX, MATCH AND MANGLE ALL YOUR MUSIC.

Start creating vibrant, engaging DJ performances no matter the source. Mix vinyl, CDs, iPod, a microphone or any other line-level audio source with Numark's iM9 four-channel DJ mixer. BeatKeeper™ technology automatically detects a song's BPM for seamless crossfades from track to track. Boost the lows or cut the highs with dedicated three-band EQ controls, or create on-the-fly remixes and stunning song transitions by engaging iM9's high-quality, beat synced effects. Incorporate a vocalist or pump-up the audience yourself with the dedicated microphone channel with XLR input, independent gain control and EQ. You can even record your DJ performances directly to an iPod docked within iM9! Housed in tough sheet-metal with solid, brick-like construction, iM9 is designed to withstand the most raucous performances and still make the next night's gig. If you're looking to add dimension to your DJing, Numark's iM9 is just the right move to take your sets in an interesting new direction.
