

## NPM100

PREMIUM, PORTABLE, ACTIVE MONITORS

**POWERFUL SOUND FOR ON-THE-GO PERFORMANCE.**

### THE MONITOR FOR WORKING DJs

Every DJ or musician needs a solid set of active monitors. Whether you are just practicing or heading to a small gig, having a solid set of monitors can make a big difference. With NPM100 you can have professional quality sound in an easily-to-transport mobile speaker system with all the right inputs. Numark's NPM100 is a complete active stereo speaker system with built-in amplifiers that is perfect for bars, practice studios, small to medium-sized setups or anywhere that premium quality sound is required.

### POWERFUL PERFORMANCE

NPM100's 100W RMS (200W peak) extended-range dual 5" drivers accurately reproduce music for DJs, musicians or anyone looking for pro-quality sound. NPM100 works with virtually all music gear thanks to a standard stereo RCA line input. The built-in gain control allows for quick adjustments when used without a mixer and the quarter-inch / XLR combi input allows unbalanced or balanced inputs. A sensitivity switch toggles between +6dB for use with mixers and -45dB for direct connection of a mic to ensure that no matter what the gig might hold, NPM100 monitors can handle it. A convenient red LED indicator is also present to indicate whenever a signal is clipping so levels can be adjusted accordingly.

Hear every nuance of your performances with Numark's NPM100 DJ monitors.

### FEATURES
