

NS7

NUMARK PERFORMANCE CONTROLLER WITH SERATO ITCH

THERE'S NS7...AND THEN THERE'S EVERYTHING ELSE. Designed by Numark in collaboration with Serato, NS7 is the pinnacle of DJ performance control. NS7 combines an all-metal chassis with adjustable torque, motorized, aluminum-turntable platters, vinyl, and a professional audio interface to deliver a complete performance solution that will satisfy even the most hardcore turntablist.

A full complement of premium faders, knobs, buttons and our new Strip Search (patent pending) virtual-needle-drop control integrates seamlessly with the included Serato ITCH software. NS7 delivers hands-on control of every aspect of Serato ITCH and sends data to the software more than ten times faster than standard MIDI resolution, resulting in a rock-solid hardware/software DJ system that works with Mac or PC and feels as good as it looks.

Serato ITCH is completely compatible with Serato Scratch LIVE crates, loops, and cue points, so the Scratch Live DJ can step up to NS7 without missing a beat. NS7 is a one-to-one hands-on control instrument for Serato ITCH that requires no tweaking and no mapping. NS7 has two seven-inch, motorized, high-torque aluminum turntable platters. The turntable controls feature modern and classic torque settings that can be set for the feel you prefer. Seven-inch, legit vinyl records with 45RPM adapters sit on real slipmats. There's no simulation here – NS7 is the real deal.

You'll spend less time looking at the screen and more time enjoying performing thanks to the visual feedback you get from NS7's 131 LEDs and 232 hands-on controls. NS7 comes with an integrated laptop stand that supplies safe, secure mounting for your laptop. You can use an ultra-small space because NS7 elevates your laptop off the table. Because NS7 sends control information over USB at extremely high speed, you get high-precision instantaneous control. You feel like you're actually touching the software.

The bar has officially been raised.

COMPUTER DJ SYSTEM

SYSTEM INCLUDES
serato
ITCH

FEATURES

- High-resolution controller built for Serato ITCH and compatible with Scratch LIVE libraries
- Direct-drive, motorized turntable platters with classic and modern torque settings
- Includes Serato ITCH DJ software, fully pre-mapped
- Audiophile-grade audio circuitry with mic and line inputs, system and cue outs
- Extensive loop, cue, and track-access controls
- Strip Search (patent pending) virtual-needle-drop control
- Controls most MIDI applications without requiring a mouse or keyboard
- Rugged, all-metal construction
- High quality, replaceable, customizable CP-PRO crossfader and D-TYPE line faders

AUDIO INPUTS

- Mic (1/4" balanced)
- Stereo line (RCA)

AUDIO INPUTS

- Master (Stereo XLRs)
- Master (Stereo RCAs)
- Booth (Stereo RCAs)
- Headphone (Stereo 1/4" and stereo 1/8")
