PK201

A 70" IMAGE THAT FITS IN YOUR POCKET

Share and Share Alike

How many times have you seen people laughing at something on their phone or laptop computer – annoying isn't it? It's as if they are in a world of their own, playing film clips or pictures to themselves, doing something which you can't take part in – very selfish!

A PK201 pocket projector solves this problem. Simply connect it to your phone or netbook and beam images up to 70" diagonal, bigger than some plasma or LCD TV's.

This tiny device has amazing WVGA resolution, VGA/HDMI input and a Micro SD slot, ideal for storing and sharing all kinds of media. From full feature films to boardroom presentations the PK201 can handle them all.

So, share and share alike, let everyone join in the fun with a PK201.

PK201 SPECIFICATIONS
